

SuperHero™

Backup and Charger for iPhone®

Made for
iPod iPhone

Made for
iPod touch® (4th generation),
iPhone 4, iPhone 3GS, iPhone 3G

A charger that saves the day!

Back up your contacts and photos every time you charge with the new Iomega SuperHero Backup and Charger for iPhone!

Your favorite people – family, friends, and business contacts and your photos are all stored on your iPhone®. What happens if it gets lost or stolen? The Iomega SuperHero Backup and Charger for iPhone lets you secure your stuff plus recharge your phone in a convenient docking station while you relax. This compact device sits easily on your counter or desktop and plugs into your wall outlet. Just insert your phone at a convenient moment and it will automatically backup your contacts and *camera roll* photos* while you recharge your phone battery.

Don't just charge, back up while you charge.

- Backup contacts and photos with 4GB of SD card capacity
- Restore them to a new iPhone if yours is lost, stolen, or destroyed
- Compact, brushed silver design
- 3 year limited warranty when you register your purchase

Secure.

When backup is included as part of your daily routine, your contacts and photos are secure! When you take your phone out of the docking station after charging, your contacts and photos remain safely backed up on the SD card (4GB capacity) included with your SuperHero. This device works with either the iPhone or the latest generation of iPod touch. If you lose or damage your iPhone, you can restore your contacts and photos to a new iPhone.

Easy-to-use.

When you purchase the Iomega SuperHero, simply download the free *SuperHero iPhone Backup App* from the Apple Store to get started. Then just place your phone in the dock to begin backing up and recharging it. The backup will start automatically when you dock your phone. A progress bar tells you when you are done. If you want more control, easy-to-use user menus let you set up what to backup and when and help you if you need to restore to a new device.

Convenient.

Just place your iPhone in the SuperHero. No extra steps are needed. Upgrade your SD card to a higher capacity if you need more backup storage in the future. The Iomega SuperHero is so compact you can take it with you when you travel for business or pleasure, when you may not want to take a computer along to charge your iPhone or iPod touch.

Easy-to-use and secure!

Using the SuperHero iPhone Backup App (download it free from the Apple Store), you can make secure backups part of your recharging routine.

Back up. The simple interface lets you select detailed options for what contacts and photos you choose to back up. During your first use, you will set up some options for which contacts and photos to back up on your phone. For future uses, the device will automatically backup according to your preferences. A progress bar lets you know when your phone backup is complete. Plus, the SD card included with the SuperHero is upgradeable so you can add more capacity if you need it by simply inserting a new SD card.

Charge. The SuperHero charges your iPhone battery automatically while it backs up your contacts and photos*. Your phone will display its battery charging icon until your recharge finishes. Times for backup and charging will vary according to how many items you have in your contacts and camera roll folder, plus how much recharging your phone requires.

Restore. If your iPhone is lost or stolen, you can easily restore contacts and the contents of the camera roll from your SD card to a new iPhone.

*Music, videos, and calendar not included in SuperHero backup or restore.

Iomega SuperHero Backup App Options screen allows easy access so you can customize your back up and restore process
